These PDF format manuals are available on the Canon website. Please download them from the following URL: <http://web.canon.jp/imaging/information-e.html>

1 Preparing the Camera → Camera User Guide

- A. Charge the battery pack.**

Place the battery pack in the battery charger and plug the charger into a power outlet or attach the power cord to the battery charger and plug the other end into a power outlet. The charge indicator lights red while charging and changes to green when the battery pack is charged. Charging the battery pack takes approximately 90 minutes.

• Battery charger model names and types vary by region.
- B. Slide the CF card slot / battery cover and open the cover.**
- C. Hold back the battery lock in the direction of the arrow with the corner of the battery pack, then insert the battery pack.**
- D. Insert the CF card.**

Insert the CF card with its label facing towards you, and push the card in until the CF card eject button fully extends.

E. Close the cover.

2 Shooting → Camera User Guide

- A. Open the lens cover and set the shooting mode dial to **AUTO**.**

The power/mode indicator lights orange.
- B. Set the date and time (first time the camera is powered on).**

 - Use the ◀ or ▶ arrow on the omni selector to select the items you wish to set, and use the ▲ or ▼ arrow to change the value.
 - Check that the date and time shown are correct, then press the **SET** button.
- C. Aim the camera at the subject and adjust the zoom to achieve the desired composition. (See "Zoom" in the "Quick Reference.")**
- D Focus and shoot.**

 - Press the shutter button halfway to focus (The camera focuses and two beeps sound.).
 - Press the shutter button all the way to shoot.

3 Playing back the Images → Camera User Guide

- A. Press the **▶** (Playback) button.**
- B. Play back the images.**

Use the ◀ or ▶ arrow on the omni selector to display the image you wish to see.

4 Erase an Image → Camera User Guide

- A. Use the ◀ or ▶ arrow on the omni selector to select the image you wish to erase (1) and press the **⏏** button (2).**
- B. When the confirmation screen appears, check that [Erase] is selected and press the **SET** button.**

Select [Cancel] using the ◀ or ▶ arrow on the omni selector to cancel without erasing.

Quick Reference → Camera User Guide

Flash

Press the **⚡** button to switch between flash modes. (Some settings are not available with certain shooting modes.)

When the red-eye reduction function is on

▶ **⚡** **👁** Auto with red-eye reduction

▶ **⚡** **👁** Flash on with red-eye reduction

▶ **👁** Flash off

When the red-eye reduction function is off

▶ **⚡** Auto

▶ **⚡** Flash on

▶ **👁** Flash off

Flash range: 55 cm – 2.0 m (1.8 – 6.6 ft.) (telephoto)/55 cm – 4.2 m (1.8 – 14 ft.) (wide angle)

* Red-eye reduction: This feature reduces the effect of light reflecting back from the eyes and making them appear red.

Macro Mode

Press the **🌸** button to display **🌸** on the LCD monitor. Use this mode to shoot close-ups of flowers or small objects.

* **Recordable Area at Minimum Shooting Range <Shooting Distance>**

At wide angle end: 64 x 47 mm (2.5 x 1.9 in.) <From the front of lens: 4 cm (1.6 in.)>

At telephoto end: 106 x 80 mm (4.2 x 3.2 in.) <From the front lens: 30 cm (1 ft.)>

Switching between Shooting/Playback

Shooting: Open the lens cover. When the lens cover is already open, press the shutter button halfway.

Playback: Press the **▶** (Playback) button.

Changing the Displayed Information

Press the **DISP** button to switch the displayed information as follows.

Shooting Mode:

▶ LCD Monitor (No Information)

▶ LCD Monitor (Information View)

▶ LCD Monitor - Off

Playback Mode:

▶ Standard Display

▶ Detailed Display

▶ No Information

Shooting Modes

AUTO: AUTO
The camera automatically selects settings.

👁: Portrait
The background is blurred and the subject is in clear focus.

🏞: Landscape
For shooting deep and spacious scenes.

🌃: Night Scene
For photographing human subjects against the backdrop of an evening sky or a night scene.

🏎: Fast Shutter
For shooting fast moving objects.

📷: Slow Shutter
For shooting moving objects to make them appear blurred, such as river rapids.

📷: Stitch Assist
Images shot in Stitch Assist mode can be merged together on a computer to make a single panoramic image.

🎥: Movie
For shooting movies.

Zoom

🏠 Wide Angle
Zoom out from the subject.

🏠 Telephoto
Zoom in on the subject.

* The zoom can be adjusted from 28 to 100 mm (35mm film equivalent).

5 Printing with a Direct Print Compatible Printer → Direct Print User Guide

- A. Connect the camera to the printer and turn on the printer's power.**
- B. **🖨**, **🖨** or **🖨** appears* in the upper left corner of the camera's LCD monitor, indicating that the printer is ready to print.**

* The displayed icon may vary depending on the printer model.
- C. Choose the image you wish to print and press the **🖨** button.**

The **🖨** button will blink blue and printing of the image will start.

6 Preparing to Download Images to a Computer → Camera User Guide, Software Starter Guide

Never connect the camera to the computer before the software is installed.

List of Things to Prepare

- Camera and Computer
- Canon Digital Camera Solution Disk provided with the camera
- Interface Cable (use the cable provided with the camera)

A. Confirm that the computer meets the system requirements.

See the *Camera User Guide*.

B. Install the software.

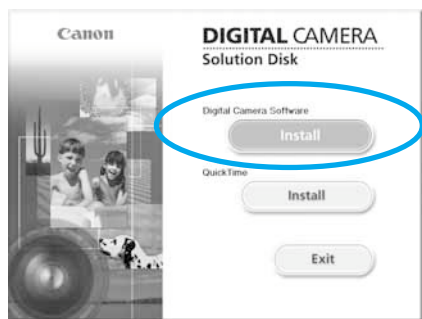

- a. Place the Canon Digital Camera Solution Disk into your computer's CD-ROM drive.

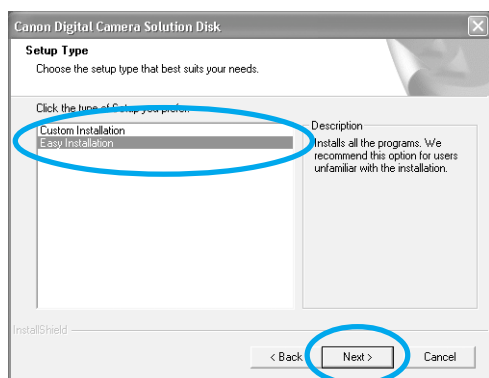

Macintosh

- With Mac OS X, double-click the CD-ROM icon, followed by the [Mac OS X] and [Canon Digital Camera Installer] icons.
- With Mac OS 9, double-click the CD-ROM icon, followed by the [Mac OS 9] and [Canon Digital Camera Installer] icons.

- b. Click the Digital Camera Software [Install] button and click [Next].

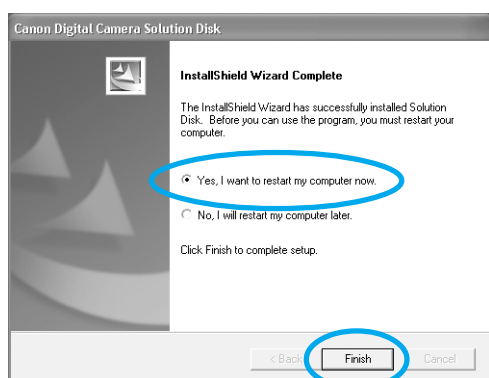

- c. Select [Easy Installation] and click [Next].

Proceed with the installation while reviewing installation settings.

- d. When the installation is complete, select [Yes, I want to restart my computer now.] in the screen below, and click [Finish].

Macintosh

Once the installation is complete, click [Quit].

- e. Remove the disk from the CD-ROM drive after restarting.

C. Connect the camera to the computer.

- a. Connect the supplied interface cable to the computer's USB port and the camera's DIGITAL terminal.

1. Open the terminal cover with your fingernail.
2. Securely insert the cable into the DIGITAL terminal and the USB port.

Once connected, the camera and the computer will be able to automatically communicate.

Windows

Windows XP

After a few moments, the dialog box shown to the right will appear and the USB driver provided with your Windows OS will automatically be installed.

Windows 2000 / Windows Me / Windows 98

After a few moments, the Add New Hardware Wizard will appear and automatically install the USB driver.

Macintosh

Mac OS X

- a. If iPhoto or Image Capture are running, click on in the upper left corner of the window to close the application.
- b. Double-click the [Canon ImageBrowser] icon on the desktop.
- c. Click [Canon Camera] in the Explorer View section.

Explorer View

Mac OS 9

- a. Confirm that [Display Images] is selected and click the [OK] button.

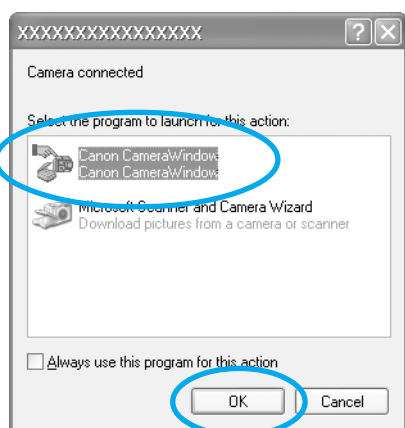

Once [Communication Settings] appears, click the [Set] button.

The name of your camera model or [Canon Camera] and the USB port number (e.g. @1) will appear here.

7 Downloading Images to a Computer → Camera User Guide, Software Starter Guide

A. Select [Canon CameraWindow] and click [OK].

If the event dialog does not appear, click the [Start] menu, then select [Programs] or [All Programs], followed by [Canon Utilities], [CameraWindow] and [CameraWindow - Set Auto-Launch].

B. Click [Set] in the [CameraWindow - Set Auto-Launch] window.

C. Select the image downloading method in the "CameraWindow - Download Image(s)" window.

You can confirm information such as the destination folder for images.

Downloading Images Using Computer Operations

- D. Click [Start Image Download].

Downloading Images Using Camera Operations (Direct Transfer)

- D. Confirm that the button lights blue.

- E. Confirm that (All Images) is selected in the Direct Transfer menu in the camera's LCD monitor and press the button.

All the images on the camera's memory card will download. To selectively download images, use the Direct Transfer menu.

The downloaded images will appear as thumbnails (tiny versions) in the main window of ZoomBrowser EX. Downloaded images are saved in separate folders according to the date on which they were shot.

You can change the settings for the images to be downloaded and the downloading destination by clicking the [Camera] menu in ZoomBrowser EX's main window and selecting [Auto-download setting].

Thumbnail

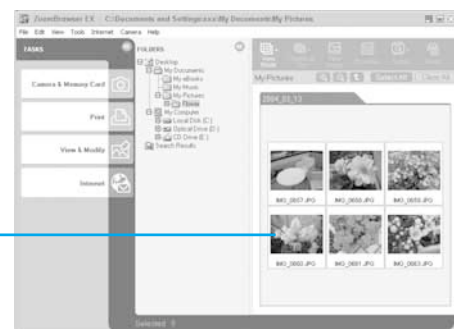

Image download is complete.

7 Downloading Images to a Computer → Software Starter Guide

Macintosh

- A. From the Explorer View section of the window, click the folder into which the images are to be downloaded.

Explorer View

- B. Click the Camera Window, making it active. Click the images you wish to download

A blue frame will appear around the selected images.

Camera Window

- C. Click [Download].

Downloaded images will appear as thumbnails (tiny versions) in the Browser area of ImageBrowser.

Thumbnail

Getting the Most out of the Software → Software Starter Guide, ZoomBrowser EX / ImageBrowser Software User Guide

What you can do with ZoomBrowser EX (Windows) / ImageBrowser (Macintosh)

Downloading Images to a Computer

You can easily download images saved in the camera to a computer.

Checking Images

You can magnify images and check the information on them (the shooting date and time, the shooting settings, etc.)

Sending Images by E-mail

You can start your e-mail program from ZoomBrowser EX (Windows) / ImageBrowser (Macintosh) and attach images to e-mail messages that you send.

Shooting with a Computer

You can operate the camera's shutter and take pictures from a computer.

Editing Movies (Only on Mac OS X when using ImageBrowser)

You can create and edit movies: link movies and stills that have been downloaded to your computer, add background music, superimpose titles and other text, and apply various effects to the movies.

Converting RAW images* to General File Formats

RAW images downloaded into a computer can be converted and saved to general file formats, such as TIFF and JPEG.

* High-quality images in which the pixels from the CCD are recorded as is, without any deterioration in image quality.

Using the My Camera Settings

Your favorite images and sounds can be registered as startup-up images and sounds with My Camera Settings.

What you can do with other software

You can use this software in even more advanced ways by linking it with other software.

Printing Images with Different Layouts

With PhotoRecord (Windows)/ ImageBrowser (Macintosh), you can lay out images as desired and then print them.

Stitching Panoramic Images

With PhotoStitch, you can connect or "stitch" multiple images together into a seamless panoramic view.

A Guide to the Manuals

Basic Methods: Software Starter Guide

Advanced Methods: PDF Manuals

The manuals in PDF format shown below are available on the Canon website. Please download them from the following URL:

<http://web.canon.jp/Imaging/information-e.html>

- ZoomBrowser EX Software User Guide (Windows)
- ImageBrowser Software User Guide (Macintosh)

Viewing the PDF Manuals

The software application Adobe Reader or Adobe Acrobat Reader is required to view the PDF manuals.

If one of these applications is not already installed on your computer, download it from the following website.
